

Bu-094

Buffing Wheel 2 1/2" Diameter 1/4" Hole

Home > Tire Repair Tools > Patching Tools

- Always wear safety goggles to protect your eyes, and wear other appropriate safety items for protection.
- Product Description
- Professional grade buffers to buff surface of the tire before cement application. Top quality carbide wheel or silicone stone wheel in two grades.
- Usage Instructions
 1. Clean area with BJ125 Rubber/Buffer cleaner.
 2. Scrape inner lining of tire with tire scraper, BJ92, to remove silicone and mold release.
 3. Inside the area effected, mechanically buff interior rubber surface of tire with a BJ94 buffing wheel along with the BJ93 drill arbor for the wheel.
 4. Buff until smooth velvet black.
 5. Be careful not to buff through the inner liner of the patch.
 6. Vacuum or wipe off excess buffing dust.
