

LIFT CADDY & BIKE CENTER JACK

JIMS LIFT CADDY

Introducing the patent pending "JIMS® Lift Caddy". This new unique product allows you to move your bike lift, with a bike on it, by yourself on a smooth floor. The sturdy steel design incorporates two low profile 2" wide heavy duty casters that can rotate 360 degrees, and is capable of handling today's heavy 900 lbs+ motorcycles. Even better, the Caddy is only activated when the lift is fully raised (not resting on any lock tabs). Once lowered to any lock tab, or the floor, the wheels camber up securing the lift to the floor as if the lift caddy isn't even there. In short, the lift only moves when you want it to and is secure when you are working on the motorcycle, as well as when loading and unloading. *For more details see No.776-IS instructions.*

No. 776 - "JIMS LIFT CADDY" will fit on "Handy®" lifts, "Handy's®" STANDARD No.10740,- and other lifts that incorporate a 2" wide cross member.

PARTS AVAILABLE SEPARATELY

NO.	QTY.	DESCRIPTION	PART NO.
