

FL POWER TRAIN ALIGNMENT TOOL

This tool easily and safely aligns the Power Train (rubber mounted engine, transmission and the swingarm assembly) to the correct position as found on most touring models. Alignment service must be performed when the engine, transmission, or swingarm has either been removed or repaired. The safety in handling and performance of the motorcycle could be greatly effected without the accurate alignment this tool provides. *For more details see No.964-IS instructions.*

No.964 - Use on 1993-2008 FLHT models.
