

UR300QVAC

OPTIONS

PART NUMBER	DESCRIPTION
28-724	24 FOOT VACUUM HOSE
30-710	DETAIL KIT WITH HOSE, BRUSH, CARPET TOOL AND CREVICE TOOL.

To clean the Bag Filter:

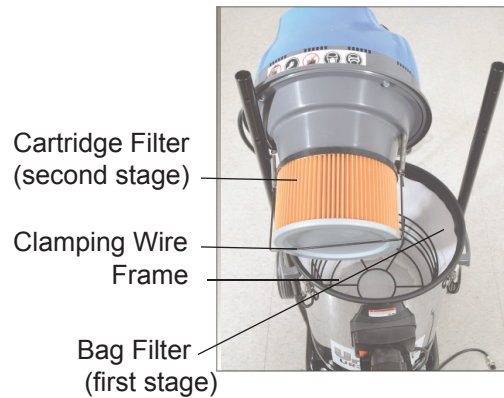

With the vacuum head removed:

- Remove the metal Frame from inside the Bag Filter.
- Remove the Bag Filter and wash with water, squeeze to dry.
- Repeat this step until the water is clean.

To clean the Cartridge Filter:

With the vacuum head removed:

- Slide off the Clamping Wire and pull off the Filter.
- Vacuum the filter inside and outside using the brush tool of another vacuum.
- Gently spray water into the inside of the filter. Let the water fill the cavity, then dump the water. Repeat this step until the water is clean.
- Gently spray water on the outside of the filter to remove the dirt.
- Let the filter air dry, then reassemble.

PREVENTATIVE MAINTENANCE

2 replacement brushes come with the vacuum. The brushes are rated for 500 hours. Replace the brushes at the earlier of the first sign of wear or 500 hours of use. The sign of wear is indicated when the vacuum motor, periodically, stops unexpectedly. See Procedure 2 under Troubleshooting on how to replace the brushes.

REPLACEMENT PARTS

PART NO.	DESCRIPTION
30-110	VAC HEAD, 120V, UR300QVAC
30-123	VACUUM MOTOR, UR300QVAC(120v)
28-129	SET OF 2 BRUSHES FOR MOTOR
